Year 3 – Single Positive COVID-19 Case

Dear parents and carers

I am writing to let you know that there has been a confirmed single case of Covid-19 within Year 3 and your child may have had contact with the positive case during their infectious period.

Children who are close contacts of someone with Covid-19 are no longer required to isolate. However, **they are advised to get a PCR test** and they are at a higher risk of developing Covid-19 in the days after contact. Your child should continue to attend school whilst awaiting their PCR test result, unless of course they are unwell or develop symptoms consistent with COVID-19.

Please be reminded that the 3 key symptoms of COVID-19 remain a temperature of 37.8 degrees or higher; a new continuous cough and a change to, or loss of taste/smell. Please also note that the most commonly reported symptoms associated with the dominant Delta variant include headache; sore throat; fatigue and cold-like symptoms. It is important to consider these additional symptoms when considering appropriate testing.

Thank you for your support

Mr G Shaw
